Jordan Lee

Rochester, NY · jordan.lee@example.com · +1-555-555-0100 · linkedin.com/in/jordanlee-example

Summary

Engineering manager with 15 years in backend and platform engineering. Leads the team that runs the shared Kubernetes, CI/CD and observability platform for 40 product teams at Example Health, and made on-call boring along the way.

Core Competencies

- Kubernetes platform operations on AWS
- Infrastructure as Code and CI/CD: Terraform, GitHub Actions
- Incident management and on-call leadership: PagerDuty, blameless postmortems
- Observability: Datadog, Grafana
- Leading engineers and team leads

Professional Experience

Engineering Manager, Platform

Example Health · Rochester, NY · Mar 2020 – Present

- Lead a platform team of 8 engineers and 2 team leads supporting 40 product teams.
- Moved all services from hand-built VMs to Kubernetes on AWS over 18 months, with no customer-facing outages during migration.
- Cut pages per on-call week from about 30 to about 8 by fixing the noisiest alerts first.
- Introduced blameless postmortems and tracked every action item to completion.

Senior Software Engineer

Example Health · Rochester, NY · Jun 2016 – Mar 2020

- Built the deployment pipeline (GitHub Actions, Terraform) that became the company standard.

Software Engineer

Sample Payments Co. · Buffalo, NY · Jul 2011 – Jun 2016

- Wrote card-authorization services in Java handling about 2M transactions a day.

Education

BS, Computer Science, Example State University, 2011

Skills

- Cloud and infrastructure: AWS · Kubernetes · Terraform · Docker
- Observability and incident management: Datadog · Grafana · PagerDuty

- Languages: Go · Python · Java · Bash
